## FOREWORD & ACKNOWLEDGMENTS

This is an upgrading and extension of the 2007 edition of the Pictorial Guide to Traditional Management, Husbandry and Diseases of the One-Humped Camel. Over 500 hundred pictures have been added to the 2<sup>nd</sup> edition and many poor quality pictures replaced. As was the case on the 1<sup>st</sup> edition the effort has required a considerable amount of work and interactions with camels and camel nomads.

As usual I would like to acknowledge the help of Mr. Gilfrid Powys for his friendship, support and knowledge-sharing on all things related to camels. Many grateful thanks also to Prof. Em. Horst Jurgen Schwartz, Prof. Carlos Gutierrez, Dr. Khalid A. El Bahrawy and Dr. Davide Monaco for generously providing numerous and unique photographic material and for their friendship. Special thanks also to Prof. T. K. Gahlot for his continuous and much appreciated support.

The following persons and Institutions are gratefully acknowledged for contributing photographs in the following chapters:
